Clearspace beneath, allows teachers to see through and monitor students from across the room

Easy-Glide wheels - lockable castors

# X4

## X4 Has been Developed by Educators for Educators.

X4 is breaking new ground for teachers and students alike. X4 provides teachers with a single, teaching platform to run individual or collaborative work groups from. Utilising both sides of X4 means that students can be learning one subject on one side, while the Activity stage with LED lighting allows different groups to create on the other. Built-in power is double insulated with a circuit breaker to provide a re-charge station for laptops as well as plenty of socket options for other external equipment. One end is lockable and the other provides ample space for storing larger items such as books, teaching computer and essential stationery in clear tote trays. X4 also acts as a room divider, freeing up valuable classroom space. X4 is 1.8m (length) x 1.2m (height) x 0.6m (wide) it is finished in hard-wearing Melteca and runs on lockable, easy-glide castors.

X4 is mobile & easy to move

Ceiling-fed power cabling

Storage & charging for up to 18 laptops

Power supplies

Storage for large items & picture books

IT Desking

Easy-Glide work surfaces

## X4 Revolutionises Learning.

Student interaction with X4 is seamless. With moveable white boards and sheet-holders, students and teachers can quickly present, evolve and collaborate. The built-in monitor lets teachers deliver lessons which are interactive, enjoyable and highly efficient.

Please note that the X4 shown in this brochure is the first prototype released in New Zealand. Whilst core features are standard, some of the secondary finishings are specific to the requirements of Stonefields School, Auckland, New Zealand and may be re-developed for future X4 releases. If in doubt, please discuss this and any other features you may need for your own suite of X4.
